

Optional Payment Plans

LEARN MORE

Do you need flexibility and want to spread out your tuition bill into multiple payments? The University of Kansas wants to make paying for your education as flexible as possible. We have partnered with TouchNet to deliver a payment plan to spread out your payments during the semester.

Payment plans are interest-free and allow you to budget and schedule payments. You or your authorized users can setup automatic payments from your bank account with E-Check/ACH with no transaction fee, or by using a credit/debit card with an additional 2.95% fee added to your total payment.

Being enrolled in the plan and making on-time payments will ensure your account is fully paid before the next term, so you are ready to enroll for the next semester.

When Can I Enroll in a Payment Plan?

You may enroll in our payment plans as soon as you have charges on your account for the new term and previous balances have been paid in full.

Will Payments be Adjusted for Changes?

Throughout the payment plan term, your payments will automatically adjust when tuition rates are finalized in July each year, and based on additions/drops of classes, additional financial aid adjustments, and other miscellaneous activities that impact your bill.

	Fall	Spring
